MG2 & 4 CMS Software

The CMS Software is an enhancement from our standard remote client by adding additional features to the standard features which comes with the remote client. Live View, Search, Smart Search, Exporting, and Archiving feature set is standard through-out all of our application while the CMS adds enhancements for a more professional monitoring environment.

Features:

- Ability to connect to multiple DVRs (49 DVRs per screen)
- Built-in DVR System Control such as PTZ Camera Control, Data Search, Voice Transmission, DVR Settings, etc.
- EMap Support: provides a visual representation of the DVR systems, cameras, sensors and relays by using image files.
- Event Management: provides a way for managing events from multiple sites and make a connection to a site through the Event Viewer.
- Simultaneous Management of Multiple Events: provides a way of processing multiple tasks including Event View, Live Pop-Up, Search Pop-Up, E-Map, Beep, and E-Mail simultaneously when an event is triggered.
- POS and Access Control Management: provides a way for managing POS and Access Control Data internally.
- Quick and Easy connection through Drag and Drop: provides an easy way of connecting by dragging and dropping a camera name from the camera list.
- Multi-Monitor Operation: provides an easy way of monitoring Real Time Videos, Event Lists and E-Map using 2 or 3 monitors.
